

Intermittent fasting: Polish and Czech Wikipedia

2024-09 to 2026-08 | Complete UTC months | all-access / user

1 / Evidence snapshot

Wiki	Last 12m views	Raw YoY	Relative YoY	Stability
PL	n/a	n/a	n/a	insufficient
CS	2,198	-53.6%	-47.0%	consistent

2 / What the evidence supports

PL: growth unavailable (no equivalent article; missing article months).

CS: -53.6% raw; -47.0% relative to project traffic. Omitting each matched month pair gives -59.5% to -45.5%.

3 / Next product check

Criterion: balanced; shortlist requires positive raw and relative growth without diagnostic flags.

No clear shortlist under the selected rule. Resolve coverage and comparability warnings first. Use target-language interviews to check the actual product need; these data alone do not justify a launch decision.

Scope and limitations

One current-title article per language. Title histories and redirect views are not merged. Language is not country; views are not people or purchase intent. Stability describes this series, not business success.

Data note: A saved snapshot was reused; freshness was not checked online.

Relative YoY = change in article share of project traffic. YoY uses the final 12 months vs the preceding 12. Gaps are missing data, never imputed zeros.

Articles and coverage

PL: no verified equivalent | 0/24 observed months

CS: Přerušovaný půst | 24/24 observed months
